EDUCATION

University of Washington

Minors in Business, Data Science, Applied Mathematics

Sep 2023 – Jun 2027

Seattle, WA

EXPERIENCE

Software & Artificial Intelligence Engineering Intern

USAFacts

Jun 2026 – Sep 2026

Bellevue, WA

- Incoming AI & SWE intern building MCP-powered interfaces for government data and AI insights.

Artificial Intelligence Engineering Intern

SeaWolf AI

Jun 2025 – Sep 2025

Seattle, WA

- Developed Python AI input routing filter for 100+ users, reducing clarification cycles by 65%.
- Built telemetry and logging APIs to monitor latency, failures, and anomalies, improving response performance by 30% and supporting issue diagnosis.
- Conducted edge-case testing under simulated traffic to identify system vulnerabilities and reduce failure rates by 15%.

Software Development Intern

ResearchHive

Jan 2025 – Apr 2025

Remote

- Enhanced React/Node.js platform connecting students with research opportunities, improving search and filtering by type, mentorship availability, and topic.
- Optimized MongoDB queries and Azure-deployed APIs, improving data retrieval latency by 25%.
- Managed JIRA tasks, sprint planning, code reviews, and documentation to ship maintainable features.

PROJECTS

LeaseLens Web App | *React, HTML/CSS, Node.js, Express, MongoDB, Gemini* Dec 2025 – Present

- Built responsive React interfaces from Figma for PDF upload, clause review, risk tags, summaries, and reports.
- Built React dashboards for upload, validation, saved history, and AI-generated results.
- Integrated Gemini API with structured JSON to extract clauses, risks, dates, fees, and terms for React dashboards.
- Added Jest tests for upload, validation, and AI analysis flows to handle input errors, API failures, and incomplete outputs.

BookSharer Web App | *React, HTML/CSS, Node.js, Express, MongoDB, Azure* Nov 2025 – Dec 2025

- Built user-facing pages for book search, review submission, reading lists, and user profiles using React, HTML/CSS, JavaScript, and REST APIs.
- Implemented validation, dynamic rendering, and authenticated flows for reviews, lists, and profiles.
- Indexed and optimized MongoDB queries, improving average data retrieval latency by 25%.

Task Management Platform | *React, Node.js, Firebase, REST APIs, Git* Mar 2024 – Jun 2024

- Built full-stack task management platform with React frontend, Firebase authentication, and Node.js REST APIs.
- Implemented validated create/update workflows and persistent user state across sessions using Firebase-backed data storage.

SKILLS

Programming: JavaScript, Python, Java, Swift, SQL, Data Structures, Object-Oriented Design

Front-End: React, HTML/CSS, Responsive Design, Accessibility, DOM Manipulation, Client-Side Validation, UX Best Practices

Backend & Data: Node.js, Express, MongoDB, Firebase, REST APIs, Gemini API

Tools: Git, Azure, JIRA, CI/CD, Performance Testing
